Specialist for Loading Technology

For the logistics sector Hörmann offers complete loading systems from a single source. The benefits: sound planning, reliable handling, maximum functionality – and excellent value for money. It pays to choose Hörmann!

Dock shelters/seals
For a variety of requirements as flap shelters, inflatable dock shelters and cushion seals.

Dock levellers
With hinged lip or telescopic lip.

Loading houses
With dock leveller and dock seal in sandwich or precast concrete construction.

For efficient and smooth transport logistics

Specialist for High-Speed Doors

Hörmann high-speed doors are well thought-out system solutions of a recognized high standard: for a fast transfer of materials, pleasant working conditions and for conserving energy. The wide range meets all the requirements.

Horizontal and vertical high-speed doors
With a transparent vision panel and opaque curtain or in the case of vertical high-speed doors also fully transparent.

High-speed doors with SoftEdge
The integral anti-crash system makes Hörmann SE high-speed doors much safer and particularly efficient.

HSR high-speed rolling shutter
Speed in a top design thanks to non-contact roll-up technology, opening speed: 2.0 m/s
